EV3411 Multi-sensor

Universal controllers with one regulation output for industrial applications

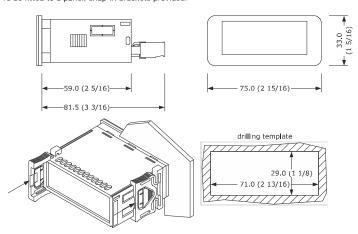

- power supply 230 VAC or 12-24 VAC/DC (according to the model)
- multi-sensor input (PTC/NTC/J/K/Pt 100/Pt 1000/Ni 120/0-20 mA/4-20 mA/0-10 V/
- multi-purpose input
- analogue output 0-10V/PWM (alternatively to relay K1)
- K1 relay 16 A res. @ 250 VAC (alternatively to the analog output)
- TTL MODBUS slave port for programming key, for EVlink BLE module (app EVconnect)
- or for TTL/RS-485 (BMS) serial interface
- on-off/PID control hot or cold mode regulation

MEASUREMENTS AND INSTALLATION

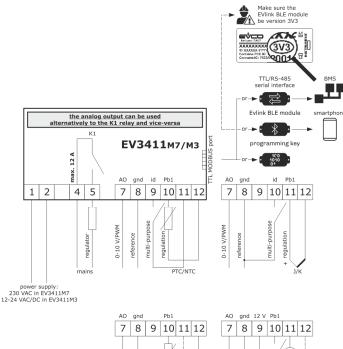

Measurements in mm (in); 59.0 (2 5/16) depth with fixed screw terminal blocks, 81,5 (3 3/16) depth with plug-in screw terminal blocks

- the thickness of the panel must be between 0.8 and 2.0 mm (1/32 and 1/16 in); ensure that the working conditions are within the limits stated in the TECHNICAL SPECIFICATIONS section;
- do not install the device close to heat sources, equipment with a strong magnetic field, in places subject to direct sunlight, rain, damp, excessive dust, mechanical vibrations
- in compliance with safety regulations, the device must be installed properly to ensure $% \left(1\right) =\left(1\right) \left(1\right) \left$ adequate protection from contact with electrical parts. All protective parts must be fixed in such a way as to need the aid of a tool to remove them.

2 ELECTRICAL CONNECTION

- use cables of an adequate section for the current running through them. ensure that the thermocouple is properly insulated from contact with metal parts or use already insulated thermocouples. if necessary, extend the thermocouple cable using a compensating cable
- in the models with power supply 12-24 VAC/DC, the analog output is available on condition that the device is powered at 24 VAC/DC.
- to reduce any electromagnetic interference locate the power cables as far away as possible from the signal cables.

PRECAUTIONS FOR ELECTRICAL CONNECTION

- if using an electrical or pneumatic screwdriver, adjust the tightening torque;
- if the device has been moved from a cold to a warm place, humidity may have caused condensation to form inside. Wait about an hour before switching on the power; make sure that the supply voltage, electrical frequency and power are within the set
- limits. See the section TECHNICAL SPECIFICATIONS; disconnect the power supply before carrying out any type of maintenance;
- do not use the device as safety device;
- for repairs and for further information, contact the EVCO sales network

3 FIRST-TIME USE

- the instructions given in the section MEASUREMENTS AND INSTALLATION.
- Power up the device as set out in the section ELECTRICAL CONNECTION: an internal test will start up. The test normally takes a few seconds: when it is finished the display will switch off.
- Configure the device as shown in the section Setting configuration parameters.
- Recommended configuration parameters for first-time use PAR. DEF. PARAMETER MIN... MAX 0.0 setpoint r1... r2

		•		•	ŀ

Then check that the remaining settings are appropriate; see the section CONFIGURATION PARAMETERS.

- Disconnect the device from the mains Make the electrical connection as shown in the section ELECTRICAL CONNECTION without powering up the device.
- When connecting to an RS-485 network, connect the EVIF22TSX interface. To use the device with the Evconnect app, connect the EVIF25TBX module; see the relative instruction sheets. If using EVIF22TSX, set the bLe parameter to 0.
- Power up the device

4 USER INTERFACE AND MAIN FUNCTIONS temperature unit on/stand-by -aut 1 °C regulator ** °F (1) Bar alarm ◄ ⚠ pressure unit of measurem **≙**SET FNC \ SET. ON/STAND-BY, DOWN. keypad lock additional escape functions

Switching the device on/off

If POF = 1 (default), touch the ON/STAND-BY key for 4s.

If the device is switched on, the display will show the P5 value ("regulation temperature"

default);	if the display shows an a	alarm code, see the sectio	on ALARMS.
LED	ON	OFF	FLASHING
OUT1	regulator active	-	- regulator protection active - setpoint being set
≱-	unused	-	-
OUT2	unused	-	-
\triangle	alarm active	-	-
<u> </u>	analogue output active	-	-
Э	device switched off	device switched on	device being switched on/off
°C/°F	temperature display	-	-
%	percentage display	-	-
Bar	pressure display	-	-

When 30s have elapsed without the keys being pressed, the display will show the " \mathbf{Loc} " label and the keypad will lock automatically

Unlocking the keypad

Touch a key for 1s: the display will show the label "UnL".

Check that the keypad is not locked.

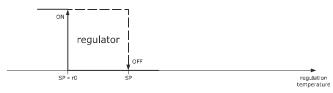

I	1.	≙SET	Touch the SET key: the display will show the label "SP".
	2.	√ FNC ✓	Touch the UP or DOWN key within 15s to set the value within the limits r1 and r2 (default "0 350").
I	3.	≙SET	Touch the SET key (or take no action for 15s).

4.4 Silencing the buzzer (if A13 = 1)

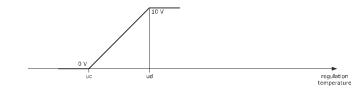

Cold mode regulation (r5 = 0)regulator

Hot mode regulation (r5 = 1).

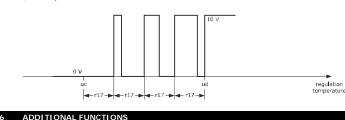

5 FUNCTION MODES

Operation with analogue output 0-10 V (ub = 0, default) proportional to the regulation temperature (ua = 1, default).

Operation with analogue output PWM (ub = 1) proportional to the regulation temperature (ua = 1, default).

Displaying/setting the value delivered by the analogue output Check that the keypad is not locked. Touch the DOWN key for 4s. FNC 🗸 Touch the UP or DOWN key within 15s to select a label LAB. DESCRIPTION uA displaying the value delivered by the analogue output uM modifying the value delivered by the analogue output

J.		Touch the SET key.
4.	₹ FNC \$	Touch the UP or DOWN key to set the value (to select uM).
5.	1 ≙ SET	Touch the SET key.

Touch the ON/STAND-BY key (or take no action for 60s) to exit

Displaying the number of start-ups of the relay

Check t	hat the	keypad is no	t locked.
1.	FN	c 🗸	Touch the DOWN key for 4s.
2.	√ FN	<u> </u>	Touch the UP or DOWN key within 15s to select a label.
	LAB.	DESCRIPTION	ON
	nS1	display of th	ne number of start-ups of the K1 relay in thousands
3.	1 29	5ET	Touch the SET key.
4.		D	Touch the ON/STAND-BY key (or take no action for 60s) to exit the procedure.

Displaying the temperature detected by the regulation probe

Check that the keypad is not locked.

	1.	FN	c 🗸	Touch the DOWN key for 4s.
	2.	√ FN	ا ا	Touch the UP or DOWN key within 15s to select a label.
"		LAB.	DESCRIPTION	NC
		Pb1	regulation t	emperature
-	3.	1 = 9	5∈⊤	Touch the SET key.
-	4.	1 (D	Touch the ON/STAND-BY key (or take no action for 60s) to exit the procedure.

Setting configuration parameters

Changing parameter P2 from °C to °F (and vice versa) causes the value of the parameters whose unit of measurement is °C or °F to be changed automatically.

1	1.	≙ SET	Touch the SET key for 4s: the display will show the label "PA".
-	2.	≙SET	Touch the SET key.
-	3.	√ FNC V	Touch the UP or DOWN key within 15s to set the PAS value (default "-19").
	4.	≙SET	Touch the SET key (or take no action for 15s): the display will show the label "SP".
	5.	√ A	Touch the UP or DOWN key to select a parameter.
	6.	aset	Touch the SET key.
	7.	√ FNC V	Touch the UP or DOWN key within 15s to set the value.
	8.	≙SET	Touch the SET key (or take no action for 15s).
	9.	≙SET	Touch the SET key for 4s (or take no action for 60s) to exit the procedure.

Restoring factory settings (default) and saving customised settings

O Check that the factory settings are appropriate; see the section ${\it CONFIGURATION}$ PARAMETERS. Saving customised settings overwrites the factory settings

1.	≙SET	Touch the SET key for 4s: the display will show the label "PA".
2.	≙SET	Touch the SET key.
3	<i>←</i> ^ <i>★</i>	Touch the LIP or DOWN key within 15s to set the value

		- V	-
	VAL.	DESCRIPTION	ON
	149	value for re	storing the factory information (default)
	161	value for sa	ving customised settings
4.	1 29	ET	Touch the SET key (or take no action for 15s): the display will show the label "dEF" (for setting the "149" value) or the label "MAP" (for setting the "161" value)
5.	29	5ET	Touch the SET key.
6.	√ FN	<u> </u>	Touch the UP or DOWN key within 15s to set "1".

ı	· · · · · · · · · · · · · · · · · · ·	V FNL V	Touch the or of bown key within 13s to set 1.
	7.	≙SET	Touch the SET key (or take no action for 15s): the display will show "" flashing for 4s, after which the device will exit the procedure.
ı	8.	Disconnect the dev	ice from the power supply.

Touch the SET key for 2s before action 6 to exit the procedure ≙ SET

9	ALARMS		
COD.	DESCRIPTION	RESET	TO CORRECT
Pr1	regulation probe alarm	automatic	- check P0
			- check probe integrity
			- check electrical connection
AL	temperature alarm	automatic	check A1, A2 and A3
iA	multi-purpose input alarm	automatic	check i5 and i6

10 TECHNICAL SPECIFIC	ATIONS						
Purpose of the control device		Operating control					
•		Operating control					
Construction of the control dev	rice	Incorporated control					
Container		Black, self-extinguishing					
Category of heat and fire resist	tance	D					
Measurements							
75.0 x 33.0 x 59.0 mm (2 15.0	/16 x 1 5/16 x	75.0 x 33.0 x 81.5 mm (2 15/16 x 1 5/16 x					
2 5/16 in) with fixed screw term	minal blocks	3 3/16 in) with plug-in screw terminal blocks					
Mounting methods for the cont	rol device	To be fitted to a panel, snap-in brackets provided					
Degree of protection prov	ided by the	IP65 (front)					
Connection method							
Fixed screw terminal blocks Plug-in screw		terminal blocks	Pico-Blade connector				
for wires up to 2.5 mm ²	for wires up to	o 2.5 mm² (on					
request)							

Maximum permitted length for connection cables

Power supply:	10 m (32.8 ft)		Analogue inputs: 10 m (32.8 ft)					
Digital inputs:	10 m (32.8 ft)		Analogue outputs 0-10 V: 10 m (32.8 ft)					
PWM analogue	outputs: 1 m (3	.28 ft)	Digital outputs: 10 m (32.8 ft)					
Operating temp			From -5 to 55 °C (from 23 to 131 °F)					
Storage tempe	rature		From -40 to 70 °C (from -40 to 158 °F)					
Operating hum	nidity		Relative humidity without condensate from 10 to 90%					
Pollution status	s of the control d	evice	2					
Compliance:								
RoHS 2011/65	/EC	WEEE 2012/19/EU		REACH (EC) Regulation 1907/2006				
EMC 2014/30/	EU		LVD 2014/35/E					
Power supply:								
230 VAC (+10	% -15 %), 50/6	0 Hz (±3 Hz), r	nax. 4 VA in EV3	3 M7				
	(+10% -15%),							
	ods for the contro		None					
	withstand voltag		2.5 KV					
Over-voltage c		, -	П					
Software class			A					
Analogue input				C, Pt 100, Pt 1000 or Ni 120				
Analogue inputs			probes, J or K thermocouples, 0-20 mA, 4-20 mA, 0-10 V or 2-10 V transducers (regulation probe)					
PTC probes	Magauramant fi	old.						
PTC probes	Measurement field:		from -50 to 150 °C (from -58 to 302 °F)					
NTC probes	Resolution:		0.1 °C (1 °F)					
NTC probes	Measurement field:		from -40 to 110 °C (from -58 to 230 °F)					
D. 100 I D.	Resolution:		0.1 °C (1 °F)					
Pt 100 and Pt			from -100 to 650 °C (from -148 to 999 °F)					
1000 probes	Resolution:		0.1 °C (1 °F)					
Ni 120 probes	Measurement fi Resolution:	eia:	from -80 to 300 °C (from -112 to 999 °F) 0.1 °C (1 °F)					
J thermo-	Measurement field:		from 0 to 700 °C (from 32 to 999 °F)					
couples	Resolution:	ciu.	1 °C (1 °F)					
K thermo-	Measurement field:		from 0 to 999 °C (from 32 to 999 °F)					
couples	Resolution:	o.u.	1 °C (1 °F)					
· ·	mA, 0-10 V and	- , ,		red				
transducers:	, 0 10 7 4114	2 .0 .	oan zo connigar					
Digital inputs		1 dry contact	(multi-purpose), not available if the analogue					
				Pt 1000 or NI 120 3 wires				
Dry contact		Contact type:		3.3 V, 1 mA				
		Protection:		none				
Analogue outp	uts	1 for 0-10 V c	or PWM signal.					
		Available in the models with power supply 12-24 VAC/I condition that they are powered at 24 VAC/DC						
Signal Minimum applicat		ble impedance 1 KOhm; 2 K		Ohm in EV3 M7.				
0-10 V Resolution:			0.01 V					
Digital outputs		1 with electro	mechanical relay (K1 relay)					
K1 relay			SPST, 16 A res. @ 250 VAC					
Type 1 or Type	2 Actions			Type 1				
	tures of Type	1 or Type 2	С					
actions								
Displays			LED display, 3 digit, with function icons					
Alarm buzzer			Built-in					
Communication	ns ports		1 TTL MODBUS slave port for programming key, for EVlink BLE module (app EVconnect) or for serial interface (BMS)
